

ISRANOVA GOLD M SBS 5

DESCRIPTION

ISRANOVA GOLD M SBS 5 is a elastomeric modified bitumen waterproofing membrane (SBS), industrially manufactured by impregnation of the nonwoven spunbond polyester reinforcement with the waterproofing compound based on distilled bitumen modified with polyolefin polymers, which gives to the compound superior technical characteristics.

Shaping of sheets, straightness, dimensional and surface uniformity are accomplished by hot calendering of the mass at hot melt fluid state.

The upper surface is coated with anti-adhesive amorphous sand. The lower surface is coated with a thermo-fusibile polyolefin film.

FIELD OF **APPLICATION**

ISRANOVA GOLD M SBS 5 is a high performance membrane. It is particularly suitable as principal layer in multi-layer waterproofing systems, with compatible membranes; it is very appropriate where the substrate undergoes significant and frequent movements.

General roofing, vehicles parking roofs, foundations, on or under floors or ground slabs, wall constructions, water tanks, tunnels are valid examples of the design application of this product. It is not suitable for roof gardens. It can be applied onto every substrate (concrete, masonry, corrugated steel decks, tension structures, pre-cast concrete roofs, wood, insulation panel, membrane, etc.) and under heavy protection.

The excellent mechanical characteristics and high level thermo-dynamic stability make it suitable for any climate conditions, particularly cold climates, and all the situations where a barrier against water is

METHOD OF **INSTALLATION**

The excellent thermoplastic properties of the waterproofing compound allow the application with torchon system or hot air generator. In particular situations, it could be applied with appropriate sealants or mechanical fastenings.

The application of the membrane must be carried in good weather conditions and after the substrate has been adequately cleaned and prepared.

PACKING AND STORAGE

The product is packed as standing rolls on wooden pallets wrapped with thermoshrinking protective hoods. Rolls must be stored in the upright position, without stacking the pallets to avoid deformations which can compromise the correct application of the membrane. The product must be stored indoor, protected from heat and frost.

SPECIAL INDICATIONS

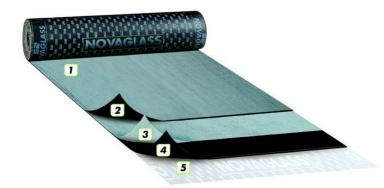

SAFETY INFORMATION

The product does not contain dangerous substances and can be considered as household rubbish or industrial waste (identification code EWC170302).

INTENDED USE OR USES

Roofing sheets: Modified bitumen sheets reinforced with non-woven polyester or other fibers for use by welding

- 1. Anti-adhesive surface
- 2. Waterproofing mass
- 3. Reinforcement
- 4. Waterproofing mass
- 5. Torch-off film

ISRANOVA GOLD M SBS 5 Rev. 1 del 01/07/2013
